What Is Your Blood Pressure?

The age of the 40s is a critical period in every person's life. And one of the most common things that make it critical is increased "blood pressure" with its accompanying "hardening of the arteries."

Scientists have fully proven that increased blood pressure is caused by poisonous deposits in the delicate tissues of the arteries. One of the chief agents in this process is coffee, with its poisonous drug, caffeine.

"A man is as old as his arteries," life insurance companies say, and the Blood Pressure Test is one of the principal factors nowadays in determining a "risk." How do you stand?

If there is any doubt about coffee's hurtingif you have frequent headaches, biliousness, sleeplessness, nervousness, or heart flutter-try a 10 days' change to

El Paso Testimony Remains Unshaken

El Pase Testimony Remains Unshaken.

Time is the best test of truth. Here is an El Paso story that has stood the test of time. It is a story with a point which will come straight home to many of us.

C. Wilson, 1232 Magoffin Ave. El Paso, says: "I suffered from pain through my back and attacks of this trouble would come on when I took cold. The pains were scute just below my kidneys and if I leaned sideways or stooped, I had sharp twinges. When I lay down, I couldn't turn over and on more than one occasion. I was confined to bed for two or three days, unable to move. I attribute the cause of my kidney trouble to exposure and hardships in the Civil Waz. I finally read of Doan's Kidney Pills and got some. They cave me prompt relief." (Statement given February 2, 1997.)

Alwars Help Him.

On June II, 1915, Mr. Wilson said: "I can recommend Doan's Kidney Pills today just as highly as ever. I use them whenever I feel any symptoms of Kidney trouble and they always help, me."
